

# IronOrbit Makes Its Debut at the Missouri's Associated General Contractors AECTechCon

**Wednesday, April 10<sup>th</sup>, 2024, Anaheim, CA - IronOrbit**, a leader in cloud computing solutions, proudly announces its participation in the upcoming AECTechCon show in St. Louis, where it will showcase its GPU-accelerated cloud desktops. Designed to meet the intense demands of BIM (Building Information Modeling) and CAD (Computer-Aided Design) applications, these cloud desktops offer unmatched performance and scalability, ideal for architecture, engineering, and construction professionals.

IronOrbit's GPU-accelerated **INFINITY Workspaces** enable seamless, high-speed access to BIM and CAD applications from any location, providing professionals the freedom to work without the limitations of traditional hardware setups. Raed Jabak, Senior Manager of products and services at IronOrbit, stated, *"With the increasing demand for GPU-accelerated cloud desktops, we are redefining the standards for cloud-based, graphics-intensive computing. Our technology is crafted to address the unique challenges BIM and CAD professionals face, offering a level of performance and flexibility that was once deemed impossible."*

The **Associated General Contractors (AGC) AECTechCon** event, carrying the theme "Innovation Across Construction," is an ideal venue for IronOrbit to unveil its customizable solutions. The conference will feature plenary keynotes, breakout sessions, hands-on instructional workshops, and an expo hall for networking and technology demonstrations. With over 400+ attendees expected, ranging from company leadership to boots-on-the-ground personnel, the event promises to cater to anyone passionate about technological innovation in the construction industry.

Raed Jabak further emphasized, *"We are excited to invite AECTechCon attendees to explore the future of graphic-intensive cloud computing at our booth. Our Gartner® Magic Quadrant™ recognized INFINITY Workspaces are more than just a performance enhancement; they are a tool for empowering professionals to reach new levels of creativity and innovation, free from the constraints of conventional hardware."*

## About IronOrbit

IronOrbit stands at the forefront of cloud computing, offering specialized solutions including virtual desktop infrastructures, managed IT, security and compliance services. With a focus on innovation, security, and exemplary customer service, IronOrbit enables businesses and professionals to leverage cutting-edge cloud technologies for enhanced growth, efficiency, and competitive advantage.
