

IronOrbit Celebrates 25 Years of Innovation

A Fully-Fledged Technology Leader Fueling Digital Transformations

Friday, January 13th, 2023 - Anaheim Hills, CA - IronOrbit, a specialized Information and Communications Technology (ICT) leader, celebrated its 25th anniversary earlier last week. Founded in 1997, IronOrbit started as a Managed Services Provider (MSP) and quickly evolved to a leading Cloud Solutions Provider with a global reach. IronOrbit offers a plethora of Information Technology (IT) services, Technology Consultancy, and Managed Desktop-as-a-Service (DaaS) solutions to various industries and segments, many of which are powered by its proprietary technology.

IronOrbit's flagship product, INFINITY Workspaces, has been recognized by many global research groups, such as Gartner, as a leading managed DaaS solution. Dubbed as the fastest GPU-accelerated hosted desktop, the solution is distinguished by its dynamic resource allocation, automation capabilities, and next-gen management interface offered through their multi-cloud IT management platform named "IOCentral" released in 2021. IOCentral enables control of hybrid IT systems, environment, and landscape from one dashboard. The company continues to produce comprehensive, industry-specific solutions that address some of the biggest technological challenges facing modern businesses, such as optimizing systems performance and perfecting the user experience.

Along its journey, IronOrbit built a solid reputation as a reliable technology partner committed to exceptional service. IronOrbit served Numerous fortune 500 companies on a 24/7/365 basis exclusively through its US-based customer support center. This could only be made possible by hiring world-class industry specialists and engineers in various technologies such as Microsoft Azure, Cisco, VMWare, Veam, Palo Alto, NVidia, SOPHOS, and many others. Ironorbit's combined expertise exceeds 300 years and includes more than 100 renowned certificates from foundational industry organizations such as ITIL and CompTIA.

"Innovation is the key to progress," says IronOrbit CEO Alexander Saca. *"For 25 years, we have been at the forefront of what technology has to offer, developing solutions and platforms that advances business transformations and enables our customers to realize their potential. Our customers have always been at the forefront of our mission objectives. We are excited for what the future holds."*

IronOrbit's portfolio today covers more than 60 products and services, stemming from 5 product families including Managed and IT Services, Cloud Services, Network and Security Services, Professional Services and Business Continuity and Resiliency services. IronOrbit serves various industries across both commercial and enterprise segments. Learn more at ironorbit.com
