

IronOrbit to Unveil the Power of its Cloud GPU Desktop at the American Institute of Architects Conference

INFINITY Workspaces powered by NVIDIA technology without impacting productivity

Monday, May 8th, 2023 - Anaheim Hills, CA - IronOrbit, a leader in GPU-accelerated cloud hosted desktops, announces its participation in the upcoming American Institute of Architects ([AIA](#)) **2023 Conference** at the Moscone Center in San Francisco from June 7-10. They will be exhibiting at **booth #967** and unveiling innovative solutions such as their turnkey managed DaaS solution, the [INFINITY Workspaces](#), and IT management portal, [IOCentral](#).

Visitors to IronOrbit's booth #967 will have the opportunity to experience firsthand the advantages of accessing their desktops from anywhere, anytime, and on any device by using INFINITY Workspaces. There is a real need for AEC firms and materials manufacturers to understand why they need to move forward aggressively in adopting technologies like managed DaaS. The IronOrbit cloud GPU desktop delivers high-performance computing power to AEC professionals who require fast and efficient processing capabilities.

As a trusted IT partner, IronOrbit guides architectural firms in adopting digital technologies. They offer tailored cloud solutions to meet business needs. IronOrbit's migration specialists seamlessly deliver INFINITY Workspaces powered by NVIDIA technology without impacting productivity. These GPU-accelerated cloud desktops ensure powerful performance for architects and engineers, enabling smooth collaboration and management of graphics-intensive applications and workloads, all for a fixed monthly cost.

"We're excited for our first exhibition at an AIA conference," said IronOrbit Chief Commercial Officer Ayman Ayoub. "We're looking forward to meeting attendees and showing them how a cloud-first strategy with our GPU-accelerated INFINITY Workspaces is sustainable and can give them a competitive edge. Adopting these solutions provides the power and performance professionals need to tackle their most demanding projects efficiently, all in a secure and scalable cloud environment."

The American Institute of Architects (AIA) is a 66-year-old organization of architects in the US. They provide education, government advocacy, and outreach to support the AEC industry. The AIA Conference is the largest and most prestigious event in the architecture industry. It attracts architects, designers, engineers, and other industry professionals worldwide to showcase the latest innovations and trends.

IronOrbit offers cloud-based solutions that help businesses modernize operations and boost efficiency. Gartner has recognized IronOrbit as a leading GPU-accelerated DaaS provider with their line of INFINITY Workspaces, each designed from the application backward to fit specific use cases.
